

Ala kanto ka kajiantsika ho lovain'ny taranaka

Let's all help save Madagascar's beautiful forests

Maky Ring-tailed lemur *Lemur catta*

Miisa 4 hatramin'ny 30 ny biby anaty andiany maky iray. Ny vavy no mifidy voalohany ny sakafo sy ny toerana ary ny lahy tiany hiraiana, fa mandefitra ny lahy. Maro ny fomba fifandraisany, amin'ny fijery, ny feo, ny fitsapa ary ny fofona.

Ringtailed lemurs live in troops of 4 to 30 individuals. Females are dominant over males for food, space, and in choosing mates. They have many social signals by sight, sound, touch and smell.

Ny alan-tsilo Spiny Forest

Ny 95 isan-jaton'ny zava-maniry ao anatin'ny alan-tsilo dia any atsimon'i Madagasikara ihany no misy azy.

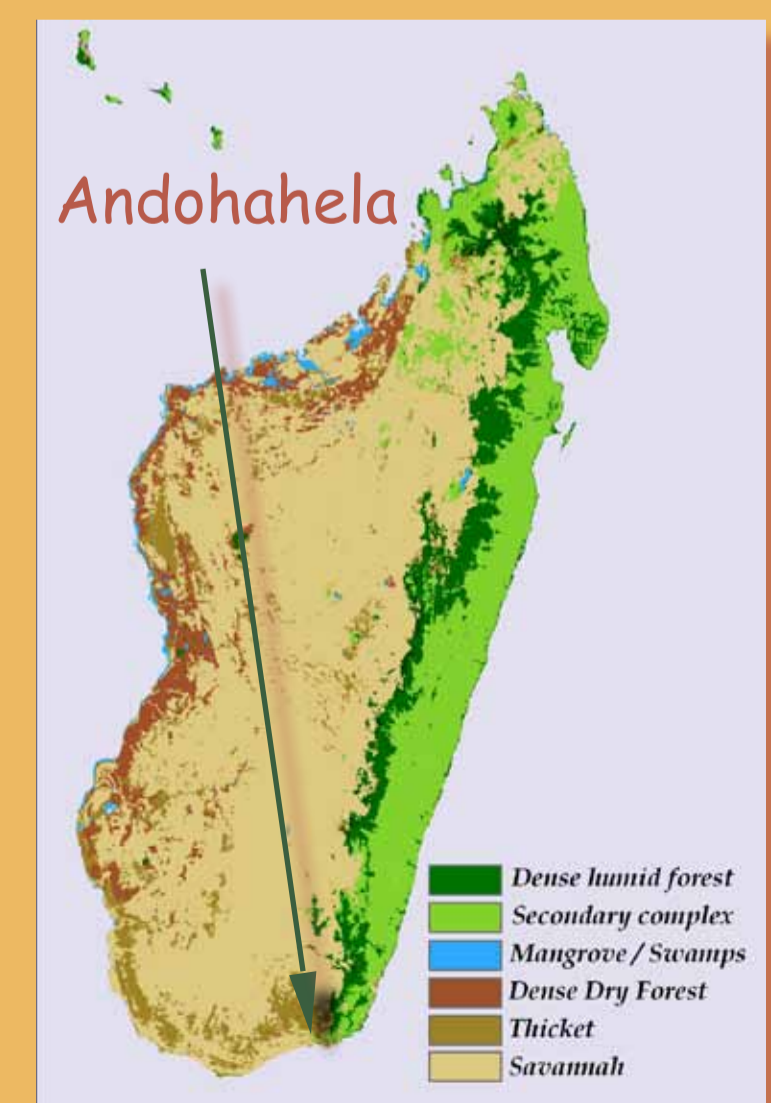

In the spiny forest 95% of the plant species are unique to the south of Madagascar.

Sonimbarike Octopus tree *Didierea madagascariensis*

Mifandray sy mifampiankina ny zava-manan'aina rehetra anaty ala

All living things in the forest are connected and depend upon one another

Maky lahy manosotra fofona ny rambony hiatrika adim-pofona. Male ringtails stink-fight by scent-marking their tails.
